

Sparkling Solutions For Water & Waste Industries

Greater efficiency, reliability & performance

With our 40 years knowledge and experience in the automation industry IMO Precision Controls is in the best possible position to provide its customers with the right solutions for their application needs. Over the years we have developed our product range to include intelligent products to meet the ever increasing requirements for greater performance, efficiency and reliability.

i³ Intelligent Control Station

Imagine being able to see what's happening in the plant from your home, a hotel room or somewhere miles away! Or being alerted to a problem with a system as soon as it is detected from anywhere in the world. IMO's powerful i³ controller can make that possible.

Remote monitoring, control and programming of devices can reduce service visits required and allow first class customer service to be provided to end customers. It minimises downtime, maximises productivity and reduces servicing costs by allowing the possibility of fault diagnosis without visiting site.

Remote access to a control system is available in two ways, using Ethernet and the Internet or by GPRS modem, your process suddenly becomes connected to the outside world.

Jaguar Drives

With over 25 years continuous innovation, today's IMO Jaguar Drive range is helping our customers fight back against the rapidly rising cost of energy, by reducing their electricity consumption on plant fans and pumps.

Our engineers have the edge in application expertise and sheer drive know-how to help, without hassle, customers achieve their optimum solution. And boasting the largest stock of AC drives in the country, backed as always by our five year guarantee, our customers can be confident that IMO can deliver.
